

CHB 8-26-0

8-26-0

General Information

CHB 8-26-0 contains liquid plant nutrients for soil application on all crops. It contains nitrogen and available orthophosphate blended with plant derived compounds that may stimulate nutrient uptake and root development.

Directions for Use

Compatibility - CHB 8-26-0 can be applied with other Bio-Gro, Inc. CHB line of secondary (Ca & Mg) and micronutrients (Zn, Mn, Cu, B & Fe). When tank mixing with trace minerals, be sure minerals are properly chelated. Always conduct a jar test if you are uncertain about compatibility or consult your Bio-Gro, Inc. dealer for more information.

Applications - CHB 8-26-0 should be concentrated to maximize response. It can be applied as a band in the soil or broadcast on the surface. It can be injected into drip, micro-sprinkler or overhead irrigation systems.

BG Rev 09-15-2006

Born:

Guaranteed Analysis

Total Nitrogen (N)	8%
2.0% Ammoniacal Nitrogen	
6.0% Urea Nitrogen	
Available Phosphate (P ₂ O ₅)	26%
Derived from anhydrous ammonia, urea, and phosphoric acid	

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:
20% yeast and soybean extract solution.

Keep out of Reach of Children CAUTION

Harmful if swallowed, inhaled or absorbed through skin. May cause eye and skin irritation. In case of contact, immediately flush eyes and/or wash skin with plenty of fresh water for at least 15 minutes.

Do not contaminate feed or food items.

Use caution in application to assure coverage on intended treatment areas only.

Suggested Applications

Soil Application Rates

All Crops: CHB 8-26-0 can be applied preplant, at planting or side dress at 5 to 30 gallons per acre. This product should not be placed directly with a seed or in the root zone. Contact your qualified dealer, product representative or agronomist for recommendations on placement of this product.

Fertigation

All Crops: Apply 5 to 20 gallons per acre per irrigation. Recommended fertigation methods include overhead sprinkler and drip irrigation. When using high rates avoid direct contact with living plant material or ensure an adequate volume of water to dilute the product on the plant surface. Minimum dilution is 1 part of CHB 8-26-0 to 1000 part waters.

Continue irrigation after application to completely flush lines and maximize nutrient distribution. CHB 8-26-0 will act as an acidifier when injected at rapid rates. After 20 minutes of injection, it is recommended to test the pH of the water. Do not adjust irrigation water to a pH of less than 5.0.

CONDITIONS OF SALE

Seller and/or manufacturer warrants only that this product consists of the ingredients specified on this label. No one is hereby authorized to make any warranty and/or guarantee concerning the use of this product. Being that the use, timing, placement, rate, application and other conditions are beyond the control of the seller and/or manufacturer, the seller's and/or manufacturer's liability for handling, storage and use of this product is limited to replacement of product or refund of purchase price.
