

# NUE Cal-8

## Is Calcium Important for the Quality of Your Produce?

NUE Cal-8 is an advanced form of foliar calcium. It has many benefits over other types of liquid calcium products including:

- NON-Nitrogen, NON-Chloride Source of Calcium
- High in organic acids – 35%
- “Dual pH System” form of Calcium
- High pH for disease suppression (foliar) & uptake
- Lower pH for foliar blending & uptake (requires NUE WC)

**NUE Cal-8 is part of the Bio-Gro Foliar Line** – Consider using it with other micronutrients (Mangensium, Zinc, Manganese, Iron, Copper or Boron). If you need nitrogen add urea or NUE Cal-Sure 10-0-0. If you need Phosphorus, why not try NUE 8-22-0 or NUE 0-18-6? If you need Potassium, use NUE 0-0-25.

**NUE Cal-8 adds value to other micronutrients** – The most valuable part of the product is the 35% organic acids; this proprietary blend of organic acids is effective in the uptake and translocation of calcium and other micronutrients such as: Magnesium, Zinc, Manganese, Iron and Copper.

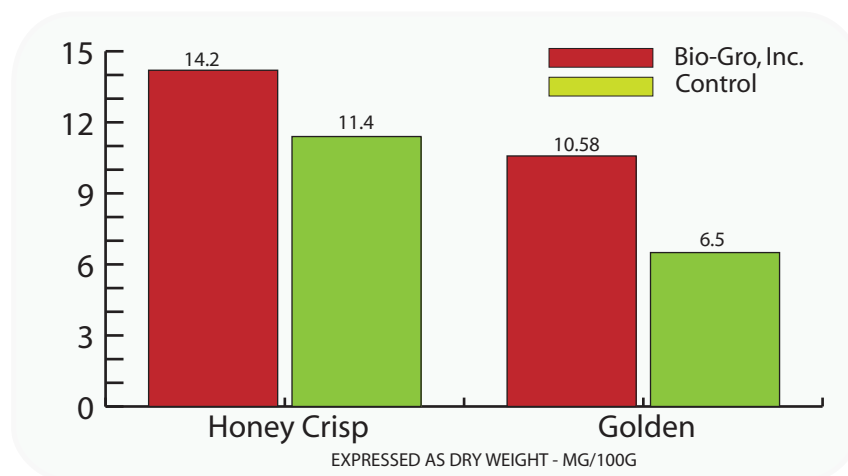

**NUE Cal-8 is more ‘Bang for the Buck’** – This product is priced competitively with other high quality liquid calcium products, however, due to the large amount of organic acids and the option of pH adjustment, NUE Cal-8 is actually 2 products in 1! A 35% organic acid solution will cost from \$5-\$20 per gallon when purchased separately; with NUE Cal-8 you get it with 8% calcium.

**NUE Cal-8 is a ‘Photosynthesis Stimulator’** – We challenge you to try higher rates of NUE Cal-8 (don’t exceed 2% solution) on fruit trees, vines or vegetables. Often you will notice a ‘greening’ effect, or even a ‘leaf shining’ effect. Bio-Gro, Inc. has discovered specific compounds in NUE Cal-8 that enhance photosynthesis.

Bio-Gro, Inc. has the tools to help you monitor soil and plant calcium, understand calcium uptake and timing based on your specific soils and crops, help you manage soil calcium uptake and supply you with proven calcium uptake products like: Premium 6, Cal-Mate, Amino 21, Bio-SB and of course NUE Cal-8.

Contact Bio-Gro, Inc. today. We will show you a lot more then NUE Cal-8, we will show you a complete calcium strategy!
