

NUE Vine Extender

NUE Vine Extender is specifically designed to increase photosynthesis and delay senescence in potato production.

NUE Vine Extender is designed to help maintain leaf health without stimulating excessive vine growth that delays bulking.

NUE Vine Extender is a proven, viable tool in potato production. The mode of action is to delay protein degradation in leaves that leads to vine senescence. It does not “re-green” leaves and needs to be applied before significant leaf deterioration occurs. When applied properly, significant delayed senescence of 1-2 weeks occurs.

Application Rate:

Ground Application: Apply 1-2 applications at a rate of 1 to 1.5 gallons per acre in 15 to 25 gallons per acre of water.

Air Application: Apply 2-4 applications of 1/2 gallon per acre in 5 gallons per acre of water.

Guaranteed Analysis 18-0-0

Total Nitrogen (N)	18.0%
0.5% Nitrate Nitrogen	
Magnesium (Mg)	1.0%
1% water soluble Mg	
Copper (Cu)	0.1%
Manganese (Mn)	0.1%
Zinc	0.2%

Delivered from: Urea, Nitrates of Magnesium, Copper, Manganese and Zinc.
