GENERAL INFORMATION

Plant-X Bio-SB is a "Plant Extract Tea". Rather than using compost or animal wastes, Bio-Gro has taken live plants and specific plant parts and "steeped" them in various media solutions.

Plant-X Products actually have a long shelf life and can be stored under proper conditions for 1-2 years. Plant-X Products do not smell "rotten" and should not be used if they do.

DIRECTIONS FOR USE

Mixing Directions - Be sure spray tank is thoroughly cleaned, fill 1/3 full with clean water, add product and continue filling with agitation.

Compatibility - Plant-X Products are compatible with most fertilizers and bioproducts. Consult your Bio-Gro dealer for more information.

When applying Plant-X Bio-SB to crops, a oil deficiency must be first documented by testing.

Storage and Disposal - Store in original containers at temperatures above freezing. Dispose waste at approved disposal facility. To dispose of containers, triple rinse and dispose according to local and state regulations.

SUGGESTED APPLICATIONS

Optimum rate of application will vary between fields depending on soil and/or climatic conditions, stage of crop growth and size of plants. The best timing is at planting or when a root flush is occurring. Consult your Bio-Gro dealer for specific recommendations.

All Field & Vegetable Crops - Apply 1-5 gallons per acre at planting. Water run 1-5 gallons per acre during germination. Water run 1-5 gallons per acre with applied fertilizers during growing season. - Apply 2-5 gallons per acre in spring and fall during root flush.

Head Lettuce - Apply no more than 1/2 gallon per acre prior to rosette stage.

Fermented Plant Material

WARNING
