

PLANT - X BIO-SB

ADVANTAGES

Provides microbial support
for root growth & VAM

Hardy, Healthier Plants

Produces Fine Root Hairs

OVERVIEW

Plant-X Bio-SB is an extract from wild plants that grow in the arid regions of the Western USA. Bio-SB contains bio-factors, or biologically produced compounds, found naturally in the soil rhizosphere produced by the plants and micro-organisms. Bio-SB contains specific bio-flavonoids, making Bio-SB a source of positive, impactful, biological activity.

COMPATIBLE

- Liquid fertilizers
- Bio-products
- Consult for detailed information

RESULTS

- Increased Root Surface Area
- Improved Fertilizer Utilization
- Improved Produce Quality

BENEFITS

Positive soil microbiology comes within the growth cycle of plants - roots, leaves, flowers and seeds - so we harvest these *live* plant tissues to ensure the greatest impact of biological activity in Bio-SB.

This extract is brewed in a proprietary growth media and produced in three forms: Bio-SB, Bio-SB LT and Bio-SB CYT.

Bio-SB promotes healthy root systems and strong plants. Bio-Gro's Plant-X line helps to populate the plant's rhizosphere with positive microbes. Bio SB is a best practice tool, and is used in non-fumigation fields, but always used in conjunction with other best practice measures.

Contact your regional Bio-Gro agronomist for more information on usage.

CONTENTS

Fermentation Media (Bio-Organic Acids).... 3%

Plant Extracts 10%

8.4 lbs/gal
pH 3.0 - 3.5

APPLICATION RATES

Best Practice: Apply Bio-SB with 1-5 gal/acre of Premium 21

Permanent Crops:

Apply 1-5 gal/acre at planting and/or Spring or Fall flush

Row Crops:

Use in-furrow, with seed when possible. Side dress and banding applications are also effective.

Storage

Do not store below 32F. Do not allow the product to freeze. Store out of direct sunlight. Keep in a cool location out of reach of children and livestock.
