

PREMIUM ORGANICS PREMIUM PLANT TEA

ADVANTAGES

Provides microbial support
for root growth & VAM

Improves tolerance to
adverse conditions

Protects roots

OVERVIEW

Premium Plant Tea is a plant extract tea fermented and extracted from specific live plant tissues - no composts or animal waste. These plant parts are steeped into a media solution, fermented under controlled conditions and stabilized.

If stored properly, Premium Plant Tea has a shelf life of 2 years.

COMPATIBLE

- Liquid fertilizers
- Bio-products
- Consult for detailed information

RESULTS

- Biological alternative
- Improved fertilizer utilization
- Improved produce quality

BENEFITS

Premium Plant Tea populates the root zone with beneficial microbes, deterring parasitic microorganisms through competition and constant stimulation of root growth. It acts as an important tool for enhancing natural VAM, beneficial fungi associated with healthy root development and increased nutrient uptake.

Premium Plant Tea should be used in conjunction with other best practices systems such as: irrigation management, salt management, root growth stimulation and overall plant nutrient management. Consult your qualified Bio-Gro agronomist for more information.

CONTENTS

Total Nitrogen (N) 0.05%
0.5% Water Soluble Nitrogen

Plant Extracts 49%

Organic Acids 5%

Amino Acids 2%

8.6 lbs/gal pH 3.5 - 4.0

APPLICATION RATES

Use 1:50 ratio in transplant water.

Planting:

2-10 gal/acre, preferably directly with seed.

Spring Root Flush:

5-20 gal/acre on permanent crops
(use with 10 gallons of Premium 21)

Drip/Sprinkler Applications:

2-4 gal/acre every 10-14 days.

Non-Fumigated Crops:

Apply an additional 30-50 gal/acre prior to planting. 20-30 gallons 1-2 weeks after planting and maintain 10-20 gal/week application until bloom.

Storage

Do not store below 32F. Do not allow the product to freeze. Store out of direct sunlight. Keep in a cool location out of reach of children and livestock.
