

PREMIUM ORGANICS PREMIUM SB

ADVANTAGES

Improves Plant Health

Improves tolerance to
adverse conditions

Increases Photosynthesis

OVERVIEW

Premium SB is an extract from plants that grow in the arid regions of the Western USA. This extract is brewed in a proprietary growth media.

Bio-Factors, or biologically produced compounds, are naturally found in a soil rhizosphere, produced by the plants and micro-organisms in the soil. Premium SB provides an additional source of positive biological activity.

COMPATIBLE

- Liquid fertilizers
- Bio-products
- Consult for detailed information

RESULTS

- Increase Fruit Consistency and Storability
- Improved Sugar Content & Fruit Size
- Maximize Investment in Nutrient Availability

BENEFITS

Positive soil microbiology comes within the growth cycle of plants - namely roots, leaves, flowers and seeds - it is these live plant tissues that are sustainably harvested for ensure the greatest impact of Premium SB.

Premium SB promotes healthy root systems and strong plants which enables a heightened tolerance to disease and environmental pressure. Bio-Gro's plant extracts do not kill disease, but populate the plant's rhizosphere with positive microbes. Premium SB is best practice tool, is used in organic fields, and always used in conjunction with other best practice measures.

8.4 lbs / gal
pH 3.0 - 3.5

APPLICATION RATES

Permanent Crops:

Apply 1-5 gallons per acre at planting and/or Spring or Fall flush.

Row Crops:

Use in-furrow, with seed if possible. Side dress and banding applications are also effective.

Best Practice:

Apply Premium-SB with 1-5 gallons per acre of Premium 21

Storage

Do not store below 32F. Do not allow the product to freeze. Store out of direct sunlight. Keep in a cool location out of reach of children and livestock.
