

PLANT - X SETMORE BASE

ADVANTAGES

Improves Stress Tolerance

Enhances Even Set Profile

Increased Root Mass

OVERVIEW

Plant-X SetMore Base is manufactured to Bio-Gro standards from a high quality kelp blend. An extract, derived from sea plants, sustainably harvested from the harsh conditions of Maine's Atlantic waters, SetMore Base contains high volumes of quality biostimulants which trigger maximum set potential.

COMPATIBLE

- Liquid fertilizers
- Bio-products
- Consult for detailed information

RESULTS

- Maximize Tuber Set
- Decrease Set Loss
- Manage Market Tuber Profile Demands

BENEFITS

SetMore Base is applied in-furrow, to improve and maximize tuber set with uniform size profiles while increasing root growth. Application increases plant health, improving stress tolerance to reduce loss of set potential and increasing plant's ability to tolerate early season weather stresses such as cold.

Active bio-stimulants in SetMore Base increase early root growth and positively effect total root mass, leading to increased nutrient uptake, particularly phosphorus.

CONTENTS

Soluble Potash 1%
Derived from Kelp Extracts

8.4 lbs/gal
pH 9.0 - 9.5

APPLICATION RATES

Row Crops:

Apply 1-3 gal/acre
Use in-furrow, with seed when possible.
Side dress and banding applications are also effective.

Mixing Instructions

Best Practice: Add to tank prior to fertilizer. Agitate prior to application.

Storage

Do not store below 32F. Do not allow the product to freeze.
Store out of direct sunlight. Keep in a cool location out of reach of children and livestock.
